Work Experience:

Digital Literacy Contest
Co-founder, Sales, Speaker
2008 – present

I was responsible for creating an educational game at all stages of its development including invention, market research, design, testing, and marketing. I was also responsible for managing employees and interns, managing relationships with clients like Brown, Cornell and Northwestern Universities, organizing 20 large events at college campuses throughout North America, leading workshops for students and faculty at universities such as Stanford University, and developing course material for upper-level college classes.

Collegiate Web Solutions
Web Developer, Content Management System Specialist
2010

I was responsible for developing and updating PHP/MySQL applications, installing a content management system based on ASP.NET called Umbraco, developing websites with XHTML/CSS/jQuery.

Sunlight Foundation
MacArthur Foundation “Young Innovator”, Game Developer
2009

I was responsible for creating an educational game at all stages of its development including invention, market research, design, testing, marketing, and completing an academic study of its effects through the University of California at Irvine. The game won a prestigious MacArthur Foundation award.

Information Technology at Purdue University (ITaP)
Lab Assistant
2007 – 2008

I was responsible for supervising and maintaining computer labs as well as troubleshooting software problems.

Purdue Colleges of Science, Liberal Arts
Web Developer
2004 – 2007

I was responsible for interviewing colleagues, developing their project websites, streamlining Dreamweaver templates, editing images, and converting web applications from ASP to PHP.
